Welcome, we are

nfiny

Web 2.0 & 3.0

Web Apps | Cloud Infrastructure | Integrations

Based in Australia, our mission is to help businesses create incredible digital products. We focus on making your next project a reality.

nfiny

Meet the
TEAM

✓ **Senior Software Engineers**
Our Software Engineers have commercial experience building large scale applications.

✓ **Senior Cloud Architects**
Our DevOps Engineers come fully equipped with AWS Certification to ensure the most robust cloud infrastructure possible.

✓ **Marketing & Branding Specialists**
Experienced in leading campaigns for tier 1 firms, and starting/helping startups scale and grow.

Pon Yuntawai
Co-Founder & Lead Cloud Architect

Senior DevOps Engineer with experience in scaling, maintaining, and implementing AWS Infrastructure

Jae Nam
Co-Founder & Lead Software Engineer

Senior Software Engineer with experience in building large scale commercial software applications.
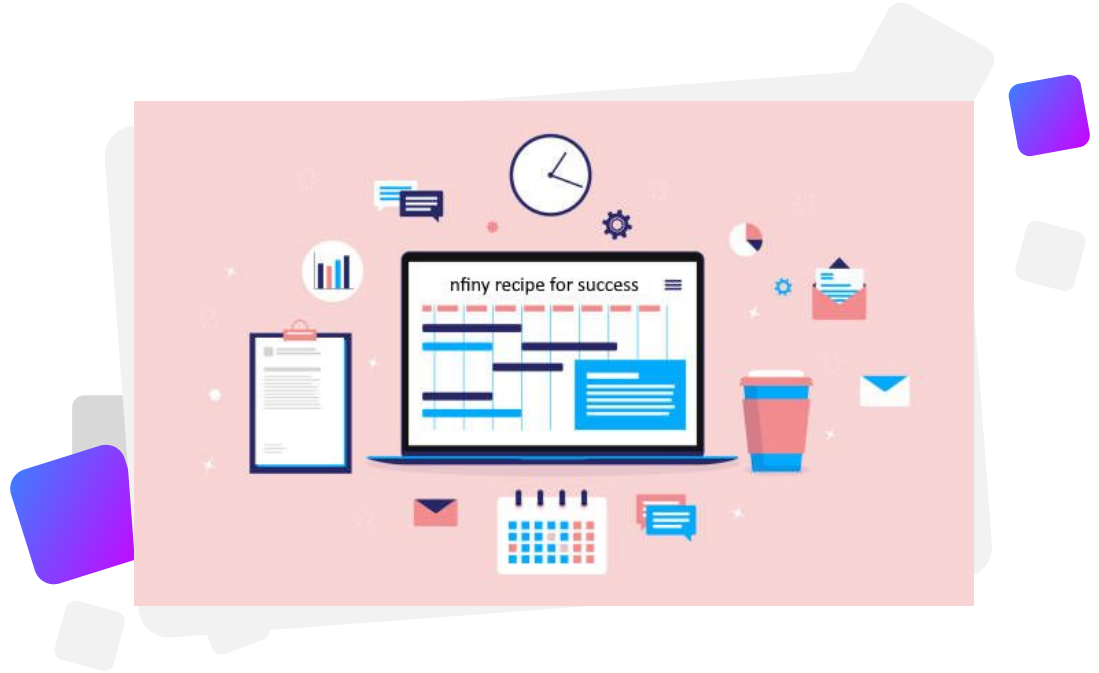

Allen Jr Jones
Relationships & Business Development

Relationship Manager with experience in B2C retail & service.

FRICTIONLESS
DEVELOPMENT

Abandon timezone and communication constraints and deliver your projects on time. We will be there from planning, implementation, and User Acceptance Testing.

Documentation, training, and technical consulting will be provided to ensure the project's successful delivery.

OUR SERVICES

Our team specializes in Web Applications, AWS Infrastructure, and Systems Integrations.

Web 2.0 & 3.0

Our team has extensive experience in Application Development. We choose the language, frameworks, and tools most suitable for your project.
Whether it be standard or decentralised - we have you covered.

DEVELOPMENT

Cloud Infrastructure

Every cloud based business requires solid infrastructure to handle scale and mitigate risk. With our AWS Certified Cloud Architects, we can help bolster your existing infrastructure, migrate on-prem to cloud, implement that CICD everyone has been asking for, and more.

CLOUD

Marketing, Brand & Customer Acquisition

Our team will assist in brand development, lead generation, content & marketing strategy to help you acquire market share and a competitive edge versus your competitors.

MARKETING

API Integrations

API Integrations are a requirement of almost all Cloud based applications. Our team comes with the know-how to integrate several systems.
Improve your workflows with API Integrations.

INTEGRATIONS

Development

Robust, maintainable, secure.

.Net Framework

.Net 6

NodeJS

ReactJS

Angular

Cloud Infrastructure

Certified AWS Cloud Architects in-house

On-premise migration to the cloud
Improving Network speed, efficiency and costs
Cloud Architecture & Naming Convention Design Services
Future-proofing scale by Auto-Scaling all areas
Security: Web Application Firewall (WAF) & Trusted Advisor
DevOps: CICD Pipelines, Git & Infrastructure-as-Code (IaC)
Database Design
SQL Server, and/or no-SQL

Consulting

Get the input you need from us

Free Consultation

Technical Advisory Services

Design

Bring your own designer, or we can find one for you.

Wireframes

UI/UX

Colour Palettes

Support

Range of post-release support options available

Short to Long Term Post-Launch Support
Bug fixes, Scope Creep, and Variability
Ongoing Code & Server Maintenance
Scheduled tasks (i.e APIs)
Ad Hoc Stack Upgrades

Marketing & Sales

Experience working with startups and scaleups, branding, and marketing.

Got to Market Strategy
Branding & Positioning
Social Media & Content Strategy

OUR PROCESS

Each stage of the project is delivered with continuous communication and feedback

1 Scope & Plan

Gather requirements, collect all the required resources, and scope out any gotchas.

2 Marketing, Branding & GTM Planning

Work with our marketing & branding specialist to position the project effectively

3 Design

We will source, or work with your design team to produce stunning UI/UX

4 Development

Maintainable and reliable code, with unit tests & security-first approach.
AWS Certified Architects will ensure the infrastructure is scalable and secure.

5 UAT & Delivery

Deployed, monitored, and tested. Documentation, change requests, and support structures are established.

6 Support

Post-release support & maintenance is offered.

Example - An end-to-end Web Application

Scoping
An verbal agreement is entered.
Scope of Work & deliverables defined.

Branding & Marketing
Begin Go to Market plan, and advertising
& branding strategy.

Development
Begin development.

Free Consultation
The client approaches **nfiny**.
We offer ways to improve
DevOps Infrastructure, consult
on Web Applications, and more.

Contract Signed
The Scope of Work & Contract
is signed by both parties.

Designs
Begin the iterative process of
mockups, wireframes, and client
sign-off

Release & Delivery
UAT performed. Once complete,
the GTM plan is executed.

Project is closed.

OUR
PARTNERS

nfiny values long term partnerships. We take great care and pride in the products we build, and services we deliver.
We firmly believe the success of nfiny is predicated on the success of our clients.

Here are some of our partners.

CLIENT TESTIMONIALS

What our valued partners have to say

Nick
Sumlookup, Director & Founder

❝ After losing a major prospect to offshoring, I found these guys. Their attention to detail, customer-first approach, and ease to speak and deal with has made them a long term partner.

Harry
Watchcrow, CEO & Founder

❝ nfiny went out of their way to understand my project to effectively apply their skill set. The relationship I have with these guys isn't just transactional - they're part of my team.

Brett
CryptoCrew, CEO & Founder

❝ The nfiny team are outstanding. They are brilliant young guys who know their craft, work hard and fast, and most importantly, they take great care in their work. Highly recommend!

OUR PROJECTS

Established in May 2022, **nfiny** is proud of the quality of projects and consulting services we have provided to date.

The quality of care we provide will exceed all expectations - as this has been the case with all our deliverables.

API Integrations

referrio

Referrio fixes job referrals for good. Refer someone to a job and get paid in crypto the minute they are hired. Anyone with a network can now refer people to any job opportunity and get paid serious amounts of money. All open, transparent and automated.
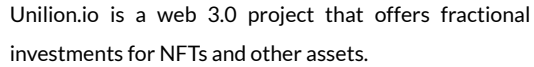

Scope of Work

Web 3.0 dApp feature & scope consulting

dApp development & deployment

Smart Contract development & deployment on ETH chain

Tech Stack

ReactJS

NodeJS

Solidity

Docker

AWS w Microservices

ECS

API Gateway

DynamoDB

UniLion

Unilion.io is a web 3.0 project that offers fractional investments for NFTs and other assets.

The project aims to lower the barrier of entry for assets typically out of reach to retail investors. Fractions of the asset can be purchased using $LION, the native token on the Binance Smart Chain (BSC).

Scope of Work

Website design & development

Deployment and LTS

Tokenised Smart Contract development & deployment on BSC

dApp consulting & design

Tech Stack

ReactJS

Solidity

aws
CONSULTING

We are partnered with firms to provide AWS Consulting services.

The projects involve major infrastructure changes, scaling, and various other implementations.

All our Cloud Architects are AWS Certified.

Scope of Work

Plan & Design Infrastructure
Architecture
Network / Traffic Optimisation
Cost Optimisation
Micro-service Designs &
Implementations
CICD
Security Enhancements
On-going Support

Tech Stack

GitHub Actions
SQL Server
AWS
Terraform
Application Load
Balancer
EC2
RDS

API Integrations

Just a few of the systems we have integrated

Anaplan

Acts as the source system for many API integrations.

Employment Hero

Web Scraping with Selenium & API Integration

Salesforce

Heavy load API Integration

Power BI

Data manipulation and Integration

Dynamics

Large source data API Integration
